

Make your Green Eyes GUI on IBM i get 70%+ dynamic transformation out of the gate

- We're thinking GUI boomshakala for existing IBM i applications
 - our typical implementation works primarily as a thin client (not as a zero-footprint / browser client)
- See our Financial Portrait accounting suite as a soup to nuts example of this style of smartclient implementation
- We don't typically sell smartclient unbundled from Financial Portrait (it's a Fresche Solutions product), but we figure that with our services (and base repository), we can help you get 70%+ dynamic transformation out of the gate if you are a shop that has good UI standards [Click to Read more...](#)
